

Power BI Learning Roadmap

1. Power BI Basics (Beginner)

- What is Power BI (Desktop, Service, Mobile)
 - Installing Power BI Desktop
 - Interface Overview
 - Importing data from Excel, CSV, Web, etc.
 - Basic data transformations with Power Query
 - Creating visuals: bar, pie, line charts
 - Publishing reports to Power BI Service
 - Introduction to DAX (e.g., SUM, AVERAGE, CALCULATE)
-

2. Data Preparation and Modeling (Intermediate)

- Cleaning and transforming data in Power Query Editor
 - Merging and appending queries
 - Creating relationships between tables
 - Understanding star vs snowflake schema
 - Calculated columns vs measures
 - Working with date tables and hierarchies
-

3. DAX Mastery (Advanced)

- Measures vs calculated columns
 - Understanding filter context vs row context
 - Key DAX functions:
CALCULATE, FILTER, ALL, RELATED, VALUES
 - Time intelligence functions:
SAMEPERIODLASTYEAR, DATESYTD, PARALLELPERIOD
 - Optimizing DAX performance
-

4. Data Visualization and Storytelling

- Using advanced visuals: Treemap, KPI, Waterfall, Funnel, Decomposition Tree
 - Creating custom visuals from Marketplace
 - Drillthrough pages, bookmarks, and tooltips
 - Interactive slicers and dynamic report titles
 - Dashboard design principles and best practices
-

5. Power BI Service & Collaboration

- Publishing reports to Power BI Service
 - Creating dashboards with tiles and Q&A visuals
 - Managing workspaces and apps
 - Setting up scheduled data refresh
 - Sharing reports and applying Row-Level Security (RLS)
-

6. Advanced & Enterprise Features (Expert)

- Creating Paginated Reports with Report Builder
 - Building reusable Dataflows
 - Using composite models and DirectQuery
 - Setting up gateways for on-prem data
 - Performance Analyzer for optimizing report speed
 - Integrating with Excel, Microsoft Teams, and SharePoint
 - Governance: usage metrics and audit logging
-

7. Projects & Certification

- Completing real-world projects (Sales, HR, Finance, etc.)
- Building a portfolio on GitHub or personal blog
- Preparing for the Microsoft PL-300 certification (optional)
